What would be one thing you think the membership should know about you (feel free to include a short paragraph)?

As a career changer, dietetics has allowed me to combine my love of science with my desire to help people. I want to empower change where people live, learn, earn, play and pray. I am looking forward to becoming more involved with NAND and to help grow and share our profession. When I am not working I enjoy spending time taking nature and landscape photographs and spending time outdoors with my dog.
